Session 2

4:00 PM CET / 10:00 AM EDT

REGISTER →

<https://app.livestorm.co/adisseo/building-resilient-reduced-antibiotic>

As the poultry industry continues to evolve toward more sustainable production systems, maintaining bird health while reducing antibiotic dependency has become a key priority.

Join us for an insightful webinar featuring leading experts who will share the latest perspectives on biosecurity, disease prevention, and resilient health management strategies.

What You Will Learn

- The critical role of biosecurity in preventing disease challenges
- Practical approaches to strengthen poultry health and resilience
- Strategies to reduce antibiotic use while maintaining performance
- Expert insights into the future of sustainable poultry production

Featured Speakers

Prof. Jeroen Dewulf

Professor, Ghent University

Presentation: The Role of Biosecurity in Poultry Health

Prof. Jeroen Dewulf is a globally recognized expert in veterinary epidemiology, biosecurity, and antimicrobial resistance. As Full Professor at Ghent University, he leads pioneering research on disease prevention and sustainable animal production. Author of over 450 scientific publications and co-founder of Biocheck.Gent, Prof. Dewulf is a leading voice in advancing biosecurity practices worldwide and shaping international animal health policy.

Dr. Tim Goossens

Innovation and Customer Success, Adisseo

Presentation: Managing Poultry Health with Reduced Antibiotics: From Risk to Resilience

Dr. Tim Goossens obtained a Master's degree in Biotechnology at Ghent University (Belgium), and a Ph.D. in Biomedical Sciences at the KU Leuven (Belgium). In 2010, he joined Nutriad, first as an R&D Engineer, later as Business Development Manager. Since 2019, he is Global Scientific & Technical Manager at Adisseo, in charge of the Animal Resilience portfolio. These solutions include probiotics, short- and medium-chain fatty-based additives, and other products and services related to animal health and performance.

Moderated by

Julie Duong

Global Poultry Marketing Manager, Adisseo

Julie holds an engineering degree in Agronomy from ISTOM (Paris, France) and a Master's degree in Strategy & Management of International Business from ESSEC Business School.

She began her career in poultry biology and nutrition in South Asia and Asia-Pacific regions. Within Adisseo, she focuses on understanding customer needs and developing practical, science-based solutions that support sustainable poultry production.
